

SCIENCES DU VIVANT - RÉGLEMENTATION POUR LES PRATIQUES EN BIOLOGIE, USAGE DES ANIMAUX À DES FINS SCIENTIFIQUES

Maintenance of skills for the use of live animals for scientific purposes #3: rodent breeding colony management

In addition to specific training, the use of live animals for scientific purposes requires a continuous training of 3 days every 6 years.

This training day validates one day of continuing education to be included in the skills booklet.

PUBLIC ET PRÉ-REQUIS

PUBLIC & PRÉ-REQUISite

Public

Technicians, engineers, researchers, teachers-researchers, doctoral students.

Pre-requisite

Basic knowledges in the use of live animals in scientific purposes .

PROGRAMME

PROGRAM

- panel of the different organisms used in animal research
- reasoned management of an animal facility :
- parameters related to reproduction
- environment-related parameters
- importance of phenotyping and genotyping of transgenic lines
- rules for developing an animal program in an animal facility
- transportation of animals used for scientific purposes

OBJECTIFS & COMPÉTENCES

Goals

- know how to choose an animal model the most suitable for the planned studies
- know the rules of management of a rodent facility
- be familiar with the requirements of the animal care program
- be warned about transportation rules for animals used for scientific purposes

LES + DE LA FORMATION

HIGHLIGHTS

- Teaching method adapted to acquire the strategic laws.
- Instructors: Professor of Genetics and Researcher, experts in use of live animals for scientific purposes.
